

I am strongly opposed the National Association of Broadcasters petition 04-160 to restrict or eliminate satellite radio, specifically XM Radio to whom I am a very, very satisfied subscriber. I am blind and they have brought me a level of listening that I haven't had in many years. With the take over of most of the independent broadcasters by the large broadcasting conglomerates the selection and quality of radio broadcasting has vastly deteriorated. XM has brought that back.

Please keep XM on the air and do everything possible to allow them to compete and grow.

Thank you.

Gilbert E. Lutz
